salt lamps

Our beautiful natural salt lamps from the Himalayas help to return Mother Nature's healing and harmonising to your space.

Many people are unaware of the health benefits of salt lamps.

Salt rock crystal is known for its ability to ionise the air. Negative ions are essential to our health and wellbeing.

Highly polluted areas often have a low negative ion balance, which leads to a feeling of reduced health and wellbeing.

Place a salt lamp in your space to enhance your wellbeing and experience an improvement in your overall health!

All lamps come with cord & globe.

What is a Detox Foot Spa?

The Dr Detox Foot Spa is a gentle non-invasive therapy, which re-energises the body and helps support the body to detoxify naturally, helping restore your natural equilibrium and well being.

During a foot detox spa treatment the Ion Cleanse unit delivers a small amount of low level, electrical current into the array (electrode), which results in a reaction between the array, the water and the Himalayan salt (added to help conductivity and increase the ionisation effect), to generate positively and negatively charged ions.

When the feet are placed in the water the interaction of the positive and negative ions re-energises, re-vitalises and supports the body's innate ability to re-balance and

achieve a higher state of well being.

How does it work?

In a healthy person, your body should have 80% negative electricity (usually known as negative ions) and 20% positive electricity (positive ions). But the human body is like a giant magnet that attracts and holds onto toxins. Heavy metals, partially oxidized fats, disassembled proteins, cholesterol deposits, uric acid, plaque, lactic acid and the vast array of chemicals that pervade our water, air and food attach themselves in ionized form to joints, organs, arteries, nerves and tissues. These toxins disrupt normal body functions creating an environment for disease, allergies, and immune system problems.

Rings cannot be worn in sport or rough lifestyles as this will damage the ring. If the ring is altered in any shape of form the warranty will become void this includes resizing. Settings

Why Platinised Plating? You can indulge in the look and feel of platinum without the pure platinum price. BAMBOO TOWELS

Eco-Friendly Cultivation

Bamboo requires very little attention when grown, and is typically cultivated without the use of herbicides or pesticides. Harvesting bamboo leaves the root of the plant alive, thereby preventing erosion.

Naturally Anti-Microbial

Textiles made from bamboo fibres resist the growth of bacteria, mildew, fungus and other microbes. This means that towels stay fresher for longer between washings.

Highly Water Absorbent and Fast Drying

Because of the structure of the individual bamboo fibres (long hollow tubes) bamboo textiles are highly absorbent, and are fast

drying. Bamboo towels absorb as much as three (3) times the water as a similar weight Cotton towel, and dry twice as fast.

- Hypoallergenic
- Machine wash on gentle cycle with cold water
- Tumble dry on low heat
- Wash with like colours
- Do not use fabric softeners
- Do not bleach
- Occasionally, you might notice a few loose threads or enlarged loops. Simply trim these to the same level as the rest of the loops with sharp scissors to prevent your towel being damaged.

THE HYDRATOR

Fill your water bottle with water from any source as long as it is not salt water. Lasts for over 300 refills. Excellent for travellers or people who work in remote locations.

Store-bought bottled water isn't just expensive. It contributes to over-consumption of tonnes of environmentally un-friendly plastic waste made from non-renewable fossil fuel resources. When these bottles are emptied, they become landfill - or garbage that ends up in waterways. Greenhouse gases are the by-product of manufacturing these disposable, store-bought plastic water bottles. So too are the carbon emissions from vehicles that transport these bottles to shops.

bling® automotive ultimate glass protection

Application

Automotive Bling® Glass Cleaner and Glass Protectant is all you need to keep your car windscreen clean and sparkling longer! Just use Bling® Glass Cleaner to remove existing dirt thoroughly from your windscreen. Then apply Bling® Automotive Protectant to repel water, dirt and bugs and improve driving visibility and safety.

Results

Bling® Automotive Glass Protectant is an advanced product that will protect your car's windscreen and offer greater safety and improved vision when driving in wet weather. When it starts to rain, dirt and dead insects, which can smear and obscure your vision, are easily swept away with the windscreen wipers. And in heavy rain the water simply

turns into droplets that are blown away by the air stream from the car's motion. The dangerous blurring and blending of on-coming traffic in rain is greatly reduced, or totally eliminated. Bling® was found to increase visibility in wet weather conditions by up to 34%. At 100kmh, this can mean an improvement in stopping time of 26 metres.

- Application is easy!
- Repels water, ice, oil, dirt and bugs
- Improved visibility in the rain – up to 34%
- Exceptional durability (up to 18,000km protection)
